## NOTES TO THE FINANCIAL STATEMENTS

As at 31 March 2026

### I. Nature of Operations

1. Ownership structure: Vinacomin - Power Holding Corporation was equitized from Vinacomin - Power Holding Corporation Vinacomin (One Member Limited Liability Company) according to Decision No. 85/QĐ-TTg dated 19 January, 2015 of the Prime Minister on approving the Plan equitization of Vinacomin - Power Holding Corporation under the Vietnam National Coal - Mineral Industries Holding Corporation Limited.

The TKV Power Corporation – Joint Stock Company operates under the Enterprise Registration Certificate No. 0104297034, initially registered on 07 December 2009 by the Department of Planning and Investment of Hanoi City, and registered for the 9th change on 10 October 2025 by the Department of Finance of Hanoi City.

The Corporation's shares are listed on the Hanoi Stock Exchange with the stock trading code DTK according to the decision No. 629/QĐ-SGDHN issued by the Hanoi Stock Exchange on 13 November 2020.

The Corporation's head office is located at 16th Floor, Vinacomin Building, 3 Duong Dinh Nghe Street, Yen Hoa Ward, Hanoi City, Vietnam.

The registered charter capital of the Corporation is VND 6,827,674,750,000 (in words: Six trillion, eight hundred twenty-seven billion, six hundred seventy-four million, seven hundred fifty thousand Vietnamese dong). As of 31 March 2026, the paid-in charter capital is VND 6,827,674,750,000, equivalent to 686,767,475 shares, with a par value of VND 10,000 per share.

2. Principal business sectors: Electricity generation, transmission and distribution.

3. Business activities:

- Investment, construction, exploitation and operation of thermal power plants, hydroelectric power plants, power plants using new energy, renewable energy and electricity grid (power supply systems);
- Generation, purchase and sale of electricity;
- Transmission and distribution of electricity;
- Management of power investment plant construction projects;
- Management of investment projects for power construction works (only when meeting the statutory requirements for project management capacity);
- Road, railway and waterway transportation services;
- Designing, manufacturing, assembling, repairing and maintaining of mechanical products, power plant equipment, electrical equipment, pressure equipment, steel structures and other industrial equipment;
- Construction of power plants, power lines, transformer stations, industrial works, civil works, transportation, irrigation, seaports, and infrastructure;
- Investment consultancy activities: Consulting on investment in the construction of power plants and power facilities (only when meeting the statutory requirements for investment consultancy capacity);
- Manufacturing of construction materials (including clay-based materials, non-baked materials, cement, lime, and gypsum);
- Trading and import/export of supplies, equipment, and goods;
- Collection and treatment of solid waste;
- Collection and treatment of hazardous waste.

Other business activities as permitted by law.

4. Operating cycle: The normal operating cycle of the Corporation is within a period not exceeding 12 months.

5. Operating characteristics of the business during the year that affect the financial statements: During the year, there were no events related to legal environment, market conditions, business operations, management, finance, mergers, divisions, separations, scale changes, etc that has an impact on the Corporation's separate financial statements.

## 6. Corporate structure

### 6.1 List of subsidiaries:

Entity name	Tax code	Address
- Vinacomin - Nong Son Coal & Power Joint Stock Company	4000463735	Nong Son Hamlet, Nong Son Commune, Da Nang City, Vietnam

### 6.2 List of joint ventures and associates:

Entity name	Tax code	Address
- Hai Phong Thermal Power Joint Stock Company	0203000279	Nam Trieu Ward, Hai Phong City, Vietnam
- Quang Ninh Thermal Power Joint Stock Company	5700434869	Group 33, Zone 5, Cao Xanh Ward, Quang Ninh Province, Vietnam
- Vinh Tan 1 Power Company Limited	3401060812	Vinh Hao Commune, Lam Dong Province, Vietnam

### 6.3 List of dependent units without legal status and with dependent accounting:

Entity name	Tax code	Address
- Vinacomin - Na Duong Thermal Power Company	0104297034-001	Zone 4, Na Duong Commune, Lang Son Province, Vietnam
- Vinacomin - Cao Ngan Thermal Power Company	0104297034-002	Quan Trieu Ward, Thai Nguyen Province, Vietnam
- Vinacomin - Son Dong Thermal Power Company	0104297034-003	Dong Ri Hamlet, Tay Yen Tu Commune, Bac Giang Province, Vietnam
- Vinacomin - Dong Trieu Thermal Power Company	0104297034-006	Dong Son, Binh Khe Ward, Quang Ninh Province, Vietnam
- Vinacomin - Dong Nai 5 Hydropower Company	0104297034-007	No. 10, Hoang Van Thu Street, Ward 1, Bao Loc City, Lam Dong Province, Vietnam
- Vinacomin - Cam Pha Thermal Power Company	0104297034-008	No. 1, Tran Quoc Tang Street, Cua Ong Ward, Quang Ninh Province, Vietnam
- Vinacomin - Na Duong II Thermal Power Plant	0104297034-009	Zone 4, Na Duong Commune, Lang Son Province, Vietnam

## 7. Statement on the comparability of information in the financial statements:

The comparative figures are those presented in the Financial Statements for the year ended 31 December 2025 (covering the accounting period from 01 January 2025 to 31 December 2025) and in the Q1 2025 Financial Statements for the period ended 31 March 2025 (covering the accounting period from 01 January 2025 to 31 March 2025).

### II. Accounting period and currency used in accounting

1. The financial year begins on 1 January and ends on 31 December each year. The first financial year began on 15 January 2016.
2. The currency used in accounting: Vietnamese dong (VND).

### III. Accounting standards and accounting regime applied

1. Applicable accounting framework: The Corporation applies the Vietnamese Corporate Accounting System issued under Circular No. 99/2025/TT-BTC dated 27 October 2025 of the Ministry of Finance, and Circular No. 202/2014/TT-BTC providing guidance on the preparation and presentation of consolidated financial statements.
2. Statement of compliance with Accounting Standards and Accounting System: The Corporation's financial statements are prepared and presented in compliance with the requirements of the current Vietnamese Accounting Standards and the Vietnamese Corporate Accounting System, as well as other relevant legal regulations on the preparation and presentation of consolidated financial statements.

### IV. Accounting policies applied (in case the enterprise meets the going concern assumption)

1. Principles for translating financial statements prepared in foreign currencies into Vietnamese Dong (where the accounting currency differs from Vietnamese Dong): Not applicable.
2. Exchange rates applied in accounting
  - Exchange rates used for recording foreign exchange differences during the period and for revaluation of monetary items denominated in foreign currencies:

+ Principle for determining actual transaction exchange rates: For foreign currency transactions arising during the period, the actual transaction exchange rate applied is the rate quoted by the commercial bank where the Corporation regularly conducts transactions. In cases where the bank does not quote a specific foreign currency rate, a cross exchange rate is applied for conversion.

+ Principle for revaluation of monetary items denominated in foreign currencies at period-end: At the reporting date, the Corporation revalues the balances of monetary items denominated in foreign currencies using the average transfer buying and selling rates of the commercial bank where the Corporation regularly conducts transactions.

- Cross exchange rates applied where banks do not quote specific foreign currency rates: Not applicable.

- Gold price used for revaluation of monetary gold (State Bank's buying price or reference buying price of authorized gold trading entities): Not applicable.

3. Principle for determining the effective interest rate (actual interest rate) for discounting cash flows: Not yet applied.

4. Principle for recognizing cash and cash equivalents.

Cash and cash equivalents include cash on hand, bank deposits, cash in transit, and short-term investments or highly liquid investments. Highly liquid investments are those with original maturities of no more than three months, that are readily convertible into known amounts of cash and subject to an insignificant risk of changes in value.

5. Principles of accounting for financial investments

a) Trading securities: Not yet applied.

b) Held-to-maturity investments: The Corporation maintains detailed records for each held-to-maturity investment by maturity, counterparty, currency, quantity, etc. At the reporting date, these investments are classified as current or non-current assets based on their remaining term (less than 12 months or 12 months and above from the reporting date).

c) Investments in subsidiaries, joint ventures, and associates: Investments in subsidiaries over which the Corporation has control are presented using the cost method. Profit distributions that the parent company receives from the accumulated profits of subsidiaries after the acquisition date are recognized in the parent company's profit or loss for the period. Other distributions are considered a recovery of the investment and deducted from the investment value.

d) Investments in equity instruments of other entities: Investments in equity instruments of other entities over which the Corporation has significant influence are presented using the cost method. Profit distributions from accumulated net profits of the associates after the acquisition date are allocated to the Corporation's profit or loss for the period. Other distributions are considered a recovery of the investment and deducted from the investment value.

d) Accounting methods for other transactions related to financial investments: Not yet applied.

6. Principles for accounting for receivables: The Corporation maintains detailed records for each receivable by customer, by nature of the receivable, distinguishing between short-term and long-term receivables, and records transactions on a collection-by-collection basis. Receivables are from customers who have economic relationships with the company in terms of purchasing products, goods, receiving services, including fixed assets and investment properties.

Provision for doubtful receivables is made for receivables that are overdue as stipulated in economic contracts, loan agreements, contractual commitments or debt undertakings, as well as receivables not yet due but considered unlikely to be recoverable. The provision for overdue receivables is determined based on the original payment terms under the initial sales contracts, without considering any extensions granted between the parties. For receivables not yet due, provisions are made where the debtor is bankrupt, undergoing liquidation procedures, missing, absconded, or where a potential loss is anticipated.

7. Principles for recognizing inventories:

- Inventory recognition principle: Inventories are measured at cost. When the net realizable value is lower than cost, inventories are measured at net realizable value. The cost of inventories includes purchase costs, processing costs, and other directly attributable costs incurred to bring the inventories to their present location and condition.

- Inventory valuation method: Inventories are valued using the weighted average method and the first-in, first-out (FIFO) method.

- Inventory accounting method: Inventories are accounted for using the perpetual inventory method, with periodic physical stocktaking.

- Method for provision for inventory devaluation: The Corporation makes provision for inventory devaluation in accordance with prevailing accounting regulations. Accordingly, provision is made for obsolete, damaged, or substandard inventories and where the cost of inventories exceeds their net realizable value at the end of the financial year.

- Basis for allocation of raw materials and materials: Raw materials and supplies are directly accumulated for each cost object. For common materials, the Corporation allocates them based on consumption norms or the ratio of actual production output incurred during the period.

8. Principles for recognition and depreciation/amortization of tangible fixed assets (including bearer plants bearing periodic produce and working animals), intangible fixed assets, finance lease assets, and investment property.

- Tangible and intangible fixed assets are recognized at historical cost. During use, tangible and intangible fixed assets are recorded at original cost, accumulated depreciation, and carrying amount.

- Finance-leased fixed assets are recognized at cost equal to the fair value or the present value of the minimum lease payments (excluding VAT) plus any directly attributable initial costs related to the finance lease. During use, finance-leased assets are recorded at original cost, accumulated depreciation, and carrying amount.

- Depreciation is calculated using the straight-line method. The estimated useful lives are based on the depreciation schedule specified in Circular No. 45/2013/TT-BTC dated 25 April 2013, as follows:

+ Buildings and structures	05 - 50	years
+ Machinery and equipment	03 - 25	years
+ Transportation vehicles	02 - 12	years
+ Office equipment	03 - 10	years
+ Other fixed assets	04 - 25	years
+ Land use rights	08 - 50	years
+ Management software and other intangible fixed as:	03 - 08	years

- Finance-leased assets are depreciated in the same manner as the Company's own fixed assets. If it is not reasonably certain that the finance-leased asset will be purchased at the end of the lease term, depreciation is charged over the lease term if shorter than its useful life.

- Investment properties are recognized at cost. During the period held for capital appreciation or for operating leases, investment properties are recorded at original cost, accumulated depreciation, and carrying amount.

- Investment properties are depreciated in the same manner as other fixed assets of the Company.

9. Principles for accounting for biological assets: Not applicable.

10. Principles for accounting for business cooperation contracts.

11. Principles for accounting for prepaid expenses.

- Prepaid expenses relating only to the business activities of the current fiscal year are recognized as short-term prepaid expenses and charged to business expenses within the same year.

- The following expenses incurred during the fiscal year but benefiting multiple years are recognized as long-term prepaid expenses and allocated gradually to the results of operations over multiple years:

- + Business establishment costs
- + Insurance premiums
- + Prepaid operating lease expenses for fixed assets
- + Significant research expenses
- + Costs incurred during the implementation phase that do not meet the criteria for capitalization as fixed assets
- + Pre-operating expenses / production preparation expenses (including training costs)
- + Tools and supplies issued with high value
- + Major repair expenses for fixed assets awaiting allocation
- + Unexpected repair expenses for fixed assets awaiting allocation
- + Other long-term prepaid expenses

12. Principles for accounting for trade payables: The Corporation maintains detailed records for each payable by counterparty, nature of the payable, and distinguishes between short-term and long-term payables, with tracking by each settlement. Payables include amounts due to parties having economic relationships with the Corporation in respect of the purchase of products, goods, and services, including fixed assets, investment property, employees of the Corporation, and tax authorities.

13. Accounting principles for dividends and profit distribution: Liabilities are recognized when there is an official resolution on dividend or profit distribution approved by the General Meeting of Shareholders or the competent authority.

14. Principles for accounting for accrued expenses: Accrued expenses of the Corporation are costs actually incurred during the financial year but not yet paid due to the absence of invoices or sufficient supporting documentation, and are recognized in production and business expenses of the financial year.

15. Principles for accounting for unearned revenue: Not yet applied.

16. Principles for accounting for provisions: Provisions are recognized when the Corporation has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

17. Principles for accounting for deferred corporate income tax: Deferred income tax is determined for temporary differences at the end of the annual accounting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred income tax assets and deferred income tax liabilities are measured using the tax rates expected to apply in the period when the asset is recovered or the liability is settled, based on tax rates and laws enacted at the end of the reporting period.

18. Principles for recognition of borrowings and finance lease liabilities: The Company tracks repayment schedules for borrowings and finance lease liabilities. Borrowings and finance lease obligations due more than 12 months from the reporting date are classified as long-term. Those due within 12 months from the reporting date are classified as short-term to ensure proper repayment planning.

19. Principles for recognition and capitalization of borrowing costs:

- Borrowing costs are recognized as production and business expenses in the period incurred, except for borrowing costs directly attributable to the acquisition, construction, or production of qualifying assets in progress. These are capitalized into the cost of such assets when the conditions set forth in Vietnamese Accounting Standard No. 16 "Borrowing Costs" are met.

- Borrowing costs directly attributable to the acquisition, construction, or production of qualifying assets in progress that are capitalized include loan interest, amortization of bond discounts or premiums upon issuance, and ancillary costs incurred in connection with borrowing procedures.

20. Principles for recognizing convertible bonds

21. Principles for recognizing owners' equity:

- Principles for recognizing contributed capital, share premium, options related to convertible bonds, and other owners' equity:

- + Contributed capital is recognized based on the actual capital contributed by the owners.

- + Other owners' equity is recorded at the residual value between the fair value of assets donated or gifted to the enterprise by other organizations or individuals, less (-) any related taxes payable (if any), and amounts supplemented from business results.

- Principles for recognizing revaluation differences of assets.

- Principles for recognizing foreign exchange differences: The Company records foreign currency balances in detail for accounts such as: cash, bank deposits, cash in transit, receivables, and payables. All exchange rate differences are recognized immediately in financial income (for gains) or financial expenses (for losses) at the time of occurrence.

- Principles for recognizing retained earnings: Retained earnings represent the profit after tax from the company's operations after deducting (-) adjustments due to retrospective application of changes in accounting policies and corrections of material errors from prior years.

22. Principles and methods for revenue recognition: Revenue is recognized when the outcome of a transaction can be measured reliably, and the Company is likely to obtain economic benefits from that transaction.

- Revenue from sale of goods

- Revenue from services rendered;

- Revenue from financial activities;

- Revenue from construction contracts.

- Other income

23. Principles for accounting of revenue deductions: The Company adjusts revenue deductions directly against sales revenue and service revenue incurred during the period, including: trade discounts, sales allowances, and sales returns. Adjustments are made in accordance with the accounting standard "Events after the end of the reporting period".

24. Principles for accounting of cost of goods sold: To ensure matching with revenue:

- This account is used to reflect the cost of sales of products, goods, services, and investment property; and the production cost of construction and installation works sold during the period (for construction enterprises). It is also used to record costs related to investment property business activities, such as depreciation, repair costs, operating lease expenses for investment property (where immaterial), and costs of disposal or liquidation of investment property...

- In accordance with the prudence principle, any costs of inventories exceeding normal levels are recognized immediately as expenses.

- Cash flows not considered deductible for corporate income tax purposes, though fully supported by valid invoices and properly recorded under accounting standards, must not be recorded as reductions to accounting expenses. Instead, such adjustments are only made during the corporate income tax finalization process, which results in an increased amount of corporate income tax payable.

- Items reducing cost of goods sold:

+ The difference between the estimated accrued costs related to property investment/construction (recognized in advance for revenue recognition purposes) and the actual lower incurred costs.

+ Differences when the provision for inventory devaluation to be recognized at period-end is lower than the existing provision for inventory devaluation already recorded.

+ Import duties, excise taxes, and environmental protection taxes included in the purchase price of goods that are refunded upon sale of such goods shall be recorded as a reduction in cost of goods sold

+ Price stabilization funds: when appropriated, the fund amount is recognized in cost of goods sold; when used for price stabilization purposes, the related amount is recorded as a reduction in cost of goods sold.

25. Principles for accounting of financial expenses:

- This account records financial expenses including expenses or losses related to financial investment activities, borrowing and lending costs, capital contribution to joint ventures or associates, losses from transfer of short-term securities, securities trading fees; provision for diminution in value of trading securities, provision for impairment of investments in other entities, foreign exchange losses, exchange rate differences, etc.

- Account 635 must be detailed for each type of financial expense.

- Items reducing financial expenses: When provisions for diminution of trading securities or impairment of investments in other entities required to be recognized in the current year are lower than the unused provision balance from the previous year, the company reverses the difference and records it as a reduction of financial expenses.

26. Principles for accounting of selling expenses and general and administrative expenses:

- Selling expenses:

+ This account records actual expenses incurred in the process of selling products, goods, or providing services, including marketing, product introduction, advertising, sales commissions, warranty expenses for products and goods (except for construction activities), storage, packaging, transportation, etc.

+ Selling expenses that are not deductible for corporate income tax purposes under tax law but have valid supporting documents and are properly recorded under accounting regulations are not recorded as reductions in accounting expenses. These are only adjusted at the time of corporate income tax finalization, which increases the amount of corporate income tax payable.

- General and administrative expenses:

+ This account records general and administrative expenses of the enterprise, including expenses for administrative staff salaries (salaries, wages, allowances, etc.); social insurance, health insurance, trade union contributions, unemployment insurance for administrative staff; office materials, office tools, depreciation of fixed assets used for management; land rental, business license tax; provision for doubtful debts; outsourced services (electricity, water, telephone, fax, insurance for assets, fire insurance, etc.); and other monetary expenses (hospitality, customer meetings, etc.).

+ General and administrative expenses that are not deductible for corporate income tax purposes under tax law but have valid supporting documents and are properly recorded under accounting regulations are not recorded as reductions in accounting expenses. These are only adjusted at the time of corporate income tax finalization, which increases the amount of corporate income tax payable.

+ Items reducing general and administrative expenses: When the provision for doubtful debts required to be recognized at the end of the current accounting period is lower than the provision already recorded in the books, etc.

27. Accounting principles for disposal and liquidation of fixed assets and investment property:

+ For fixed assets: Upon disposal or liquidation, the entity derecognizes both the gross carrying amount and the accumulated depreciation of the asset. Proceeds from disposal or liquidation are recognized as "Other income", while the net carrying amount of the asset and related costs incurred are recognized as "Other expenses".

+ For investment property: Upon disposal or liquidation, the entity derecognizes the gross carrying amount and accumulated depreciation/amortization in the accounting records. Revenue from the sale of investment property is recognized as revenue from sale of goods and provision of services, while the net carrying amount and directly attributable selling costs are recognized as cost of sales.

28. Principles and methods for recognizing current corporate income tax expenses and deferred corporate income tax expenses: Current corporate income tax expenses are determined based on taxable income and the applicable corporate income tax rate for the year. Deferred corporate income tax expenses are determined based on temporary deductible differences, taxable temporary differences, and the applicable corporate income tax rate. Current corporate income tax expenses must not be offset against deferred corporate income tax expenses.

29. Other accounting principles and methods.

The fair value of the investments in Hai Phong Thermal Power Joint Stock Company and Quang Ninh Thermal Power Joint Stock Company is determined based on the closing prices of these two securities on the UPCoM as at 31 March 2026. The Corporation assesses that the recoverable amount of its investment in Vinh Tan Company is equal to its cost. This assessment is based on the investee's profitable operating results and its stable growth prospects. Accordingly, as there is no indication of impairment, no provision for diminution in the value of financial investments has been recognized as at 31 March 2026.

- Summary of operating performance of subsidiaries, joint ventures and associates, and status of BCC contracts during the period:

+ Operating performance of the subsidiary: Nong Son Coal and Power Joint Stock Company, in which the Corporation holds an ownership interest of 88.27%. The company is operating normally; during the period, it incurred a loss of VND 5.25 billion.

+ the Corporation did not have any investments in joint ventures or associates during the period.

+ the Corporation did not engage in any business cooperation contracts (BCC) during the period.

- Significant transactions between the Corporation and its subsidiaries, joint ventures, associates and BCC during the period:

+ Significant transactions between the Corporation and its subsidiary: During the period, the Corporation entered into significant transactions with Nong Son Coal and Power Joint Stock Company – TKV, including: (i) revenue from coal sales: VND 44.68 billion; (ii) cost of coal purchases: VND 43.25 billion; (iii) interest income received: VND 5 billion.

+ the Corporation did not have any Significant transactions with joint ventures or associates during the period.

+ the Corporation did not have any Significant transactions under business cooperation contracts (BCC) during the period.

- In cases where the fair value or explanation of reasons: None.

- Basis for determining the value of intangible fixed assets such as intellectual property rights when contributing capital to subsidiaries, joint ventures or associates: the Corporation did not contribute capital in the form of intangible fixed assets to investees.

<b>(**) Deferred corporate income tax expense</b>		
- Deferred tax expense arising from taxable temporary differences	0	0
- Total Deferred corporate income tax expense	0	0

**VIII. Additional information for items presented in the Statement of Cash Flows**

1. Cash held by the enterprise but not available for use: None.
2. Non-cash transactions that may affect the Statement of Cash Flows in the future: None.
3. Proceeds from borrowings received during the period:

Items	Current period	Previous period
- Proceeds from borrowings under standard loan agreements;	2,191,005,949,745	2,987,258,217,861
- Proceeds from issuance of ordinary bonds;		
- Proceeds from issuance of convertible bonds;		
- Proceeds from issuance of preference shares classified as liabilities;		
- Proceeds from repurchase agreements of Government bonds and securities (REPO);		
- Proceeds from other forms of borrowings.		

4. Repayments of borrowings made during the period:

Items	Current period	Previous period
- Repayment of principal under standard loan agreements;	1,805,242,052,953	3,127,372,423,127
- Repayment of principal of ordinary bonds;		
- Repayment of principal of convertible bonds;		
- Repayment of principal of preference shares classified as liabilities;		
- Payments for repurchase agreements of Government bonds and securities (REPO);		
- Repayment of borrowings under other forms.		

5. Acquisition and disposal of subsidiaries during the reporting period: None.

**IX. Other Information**

- Contingent liabilities, commitments, and other financial information:
  - Events occurring after the end of the previous accounting period
  - Information on related parties (in addition to the disclosures provided in the sections above).
  - Presentation of assets, revenues, and business results by segment (by business sector or geographical area) in accordance with Accounting Standard No. 28 "Segment Reporting"(1):.
  - Comparative information (changes in information in the financial statements of previous accounting periods):
  - Information on the assessment of the going concern assumption, in cases where the Management determines that events or conditions exist that may cast significant doubt on the entity's ability to continue as a going concern: None.
  - Disclosure of significant assumptions and estimates: None.
  - Other measures/solutions: None.
- X. Amendments and supplements to the templates, titles, and contents of items in the Financial Statements compared to the Financial Statement templates prescribed by the Ministry of Finance (if any).
